To the Students, Parents, and Guardians of Grass Lake Community Schools:

We received information this morning that one of our high school students has tested positive for the coronavirus. We are working through this issue with the guidance of the Jackson County Health Department. The student and any close contacts have been identified and directed to quarantine for fourteen (14) days. The custodial staff and the transportation department have been directed to sterilize and deep clean any areas where there may have been close contact. The Health Department has determined that it is safe for students to return to remain in school with the exception of those students that have been quarantined.

While we have addressed this issue quickly and efficiently, there is a great deal of uncertainty from one day to the next today's world. Therefore, we are telling all students to make sure they leave school today with their chromebooks and any other necessary materials in case this "spider-webs" into a larger issue.

Thank you for your help and assistance during this somewhat "crazy" time in our lives. Safety is a priority of Grass Lake Schools and we will continue to proceed with that in mind.

Dr. Ryle Kiser  
Grass Lake Community Schools  
Superintendent
