Career & Technical College

Before you enroll, DO THIS!

1. Consider getting the training at the Career Center before you are out of high school to save money!
2. Investigate training alternatives, like community college, if they have the same program it will most likely be cheaper
3. Compare programs: What will you get when you graduate?
4. Visit the school and look for the following: maintained facilities, up-to-date equipment, Instructor qualifications, classes engaging.
5. How MUCH will it cost?
6. Ask for information on the school's licensing and accrediting organization.
7. Check the BBB for filed complaints!
